DIESELJET

Stylish
Powerful
Comfortable

Introducing the new **Dieseljet** range from Williams,
the world's leading jet tender specialists

The definitive range of diesel powered jet tenders, built for professionals who demand a practical superyacht tender with a performance edge.

Williams are the world's leading jet tender specialist, renowned for their high performance Turbojet range specified by many leading yacht manufacturers such as Sunseeker, Princess, Fairline, Ferretti and Azimut-Benetti. The **Dieseljet** range has been developed to satisfy the demands of these high profile yacht builders and their customers for stylish, functional, and high performance diesel tenders built to the most exacting standards.

A superyacht tender must fulfil a variety of roles. It will be used extensively as a day boat, but it must also be sufficiently stable to carry a large number of people in comfort, keep these people dry and be powerful enough to pull a waterskier. Each tender in the **Dieseljet** range has been specifically designed by **Williams** to fulfil these requirements successfully.

Williams Dieseljets have the same innovative layout with forward driving position and clever packaging to maximise the secure and comfortable seating. All are fitted with the **Williams** high performance 220mm axial flow jet pump system.

Through its understanding of yacht owners' requirements, **Williams** have created an extensive range of tender options and accessories. From custom coloured finishes and fabrics, to electronic navigation equipment and practical weather protection, a **Williams Dieseljet** can be created which is visually unique and specified exactly to an owner's wishes.

DIESELJET 445

Dieseljet 445 – Compact performance

Designed to fit yachts of 24 metres LOA and larger, the most compact of the **Dieseljet** range is capable of comfortably carrying 7 adults for ferrying duties or pulling a monoskier from a deepwater start. Power comes from the 110hp Yanmar diesel engine so there is no requirement to carry gasoline on board, and the tender can be fuelled directly from the parent yacht.

Its practical deck layout provides the maximum amount of seating with ample open space for movement. Stepping aboard is safe and secure as the **Dieseljet 445** has been designed to be supremely stable at rest, and when travelling at speed passengers are seated near the centre of the boat for the most comfortable ride. When underway, a deep sportsboat hull ensures sure-footed handling and a smooth passage over choppy water.

Options and accessories for your Dieseljet 445

Options

Coloured tubes • Coloured gelcoat • Vinyl upholstery • Sunbrella upholstery
Embroidered boat name on helm backrest • Carbon fibre dashboard inlay
Spray/metallic finish on mouldings • Boat name on tubes

Accessories

Chart plotter • Digital depth sounder • MP3 music package • VHF radio

Underwater lights • Shorepower • Single point lift kit • Automatic bow tube inflator
MCA LY2 rescue tender pack • Sunbathing pad • Chocks • Electric inflator
Platform kit (tie downs + lifting strops + over straps) • Battery charger/optimiser
Stainless steel anchor • Telescopic paddle

Weather protection

Bimini • Spray dodger • Overall cover • Windscreen (pictured right)

Specifications

LOA:	4.54 m
Beam:	2.02 m
Overall Height:	1.10 m
Draft:	0.27 – 0.42 m
Engine:	Yanmar 4JH4 (110HP)
Dry Weight:	755 kg
Seating:	7 persons
Fuel Capacity	50 litres
Maximum Speed:	35 knots
Tube Material:	Hypalon

DIESELJET 505

Dieseljet 505 – Effortless cruising

The **Dieseljet 505** is a practical people carrier for yachts in excess of 30 metres LOA. She offers seating for 8 adults in a comfortable and spacious cockpit, with storage in a lined locker forward as well as two practical storage bags under the rear seat. Power comes from the 110hp Yanmar diesel engine coupled to the Williams pump; this proven drivetrain delivers pinpoint low-speed manoeuvrability but also massive amounts of torque, allowing the **Dieseljet 505** to cruise with minimal fuss even when fully loaded.

As with all models in the range, the **Dieseljet 505** can be fitted with a number of practical accessories designed to enhance the boat and equip her for more extended cruising. These include a folding windscreen and bimini sunshade (which can be used when underway, subject to a speed restriction) which provides full protection over the centre of the boat. Also available is a convenient single point lift kit which is ideal for speedy launching and recovery, or for garage-mounted cranes where height is restricted.

Options and accessories for your Dieseljet 505

Options

Maximum Speed:	34 knots
Tube Material:	Hypalon

DIESELJET 565

Dieseljet 565 – The superyacht choice

The **Dieseljet 565** steps up in size, both in length and beam, from the **505**. Not only does this provide extra hull in the water for increased performance in rougher conditions, but also improved deck space to allow for more storage and seating for 9 persons. She is fitted with the 150hp Yanmar diesel engine which delivers extra power through the Williams pump system, enabling the **Dieseljet 565** to rise on the plane effortlessly even with a full complement of passengers.

As with all **Dieseljet** models, optional customisation is extensive. All glass fibre mouldings can be colour matched or finished in metallic paint, inflatable tube colours can be chosen from 30 different options, and upholstery can be specified in either vinyl or Sunbrella fabric. Additionally, a yacht name can be applied to the inflatable tube and embroidered to the upholstery backrests. The overall result is a tender which reflects the style and taste of its owner and is certain to draw attention in any harbour or bay.

Options and accessories for your Dieseljet 565

Options

Seating:	9 persons
Fuel Capacity	100 litres
Maximum Speed:	36 knots
Tube Material:	Hypalon

DIESELJET 625

Dieseljet 625 – The tender dayboat

The **Dieseljet 625** is the largest model in the range and offers an expansive open deck area for extra seating and storage. Powered by the 180hp Yanmar diesel, the **Dieseljet 625** has ample power to perform her duties with ease. Her extra hull length enhances rough water performance – able to effortlessly slice through waves, giving her 11 passengers a dry and comfortable ride for longer trips away from the parent yacht.

In common with other **Dieseljet** models, optional weather protection in the form of a folding windscreen, spray dodger and bimini sunshade enhance the **625's** practicality as a serious dayboat. After a morning waterskiing, guests can use the on-board freshwater shower before relaxing in the **625's** spacious cockpit. A 30 knot blast back along the coast will be the exhilarating end to a perfect day.
